## Product Bulletin

## PB 342 <br> Hirschmann® RSP Switches

High-availability network devices that can withstand the toughest conditions and provide the latest authentication and user access security mechanisms.

The RSP Switch Series<br>Supports the New IECStandard Redundancy Protocols (PRP, HSR). Networks Can Now be Built With Genuinely Uninterrupted Data Communication.

- Failover time of 0 ms guarantees high productivity for machines and systems
- Extensive security functions guarantee all-round protection against unauthorized intrusions and operator errors
- Precise synchronization enables applications to comply with stringent real-time requirements

The new RSP switches provide robust hardware and a powerful operating system and can withstand extremely harsh environmental conditions. The integration of new redundancy protocols allows uninterrupted data communication.

These new techniques, PRP (Parallel Redundancy Protocol) and HSR (Highavailability Seamless Redundancy), are based on the international IEC62439 standard to guarantee future security and interoperability. Precision timing with IEEE 1588v2, synchronizes sensors, drives and measuring equipment. Gigabit Ethernet provides a fast connection to the backbone, while connections to terminal equipment use 100 BASE-TX or 100 BASE-FX.

## Applications

The RSP switches are optimized for environments such as the power utility industry where downtime is not an option. The RSP switches guarantee uninterrupted communication under the harshest conditions.

The RSP switches offer optimum solutions wherever uninterrupted data communication is of the essence, as in mechanical engineering, production or security applications.

## Benefits

The RSP switches are the first to allow uninterrupted data communication to ensure continuous access to machines and systems in order to increase productivity and profitability. The switches feature comprehensive security functions to provide all-round protection against unauthorized access. Since they also support precise synchronization, they can be used to safely network applications that are subject to stringent real-time requirements.

## RSP Switches at a Glance

RSP switches offer eleven ports, three of which can be equipped with SFP transceivers that support Fast ( 100 BASE-FX) or - optionally - Gigabit-Ethernet (100/1000 BASE-FX). The remaining ports can be used either for 100 BASE-TX or as a combination of four SFP transceivers and four TX ports. These switches have extensive management and redundancy methods, as well as enhanced security mechanisms. In addition, a version is available to precise synchronization compliant with IEEE 1588v2, plus PRP (Parallel Redundancy Protocol) and HSR (High-availability Seamless Redundancy).

## Advantages at a Glance:

- Extensive range of redundancy methods: PRP, HSR, PRP/HSR Red Box, MRP, Fast MRP, RSTP
- Precise synchronization compliant with IEEE 1588 v2
- Enhanced security mechanisms: authentication, radius, role based access, port security, SSHv2, HTTPS and SFTP, plus others currently in preparation.
- Fast device replacement, comprehensive logging and storage of all configuration data, plus operating software updates via SD card
- High level of vibration resistance
- Broad immunity to electrostatic discharges and magnetic fields
- Temperature range from $-40^{\circ} \mathrm{C}$ to $+70^{\circ} \mathrm{C}$
- Power supply $24 / 36 / 48$ V DC or $60 / 120 / 250$ V DC and $110 / 230$ V AC
- Strong and compact metal housing

0 ms switchover time the RSP switches support the redundancy protocols PRP and HSR.

## RSP Switches Technical Specifications

| Product Description |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Type | RSP20-xx | RSP30-xx | RSP25-xx | RSP35-xx |
| Description | Managed, Industrial Switch DIN Rail, fanless design |  |  |  |
| Port Type and Quantity | Ports in total: $11,3 \times$ FE SFP slots, $4 \times$ FE SFP/4 x10/100 TX ports, or $8 \times 10 / 100$ TX ports | Ports in total: $11,3 \times$ FE/GE SFP slots, $4 \times$ FE SFP/4 x10/100 TX ports, or $8 \times 10 / 100$ TX ports | Ports in total: $11,3 \times$ FE SFP slots, $4 \times$ FE SFP/4 $\times 10 / 100$ TX ports, or $8 \times 10 / 100$ TX ports | Ports in total: 11, $3 \times$ FE/GE SFP slots, $4 \times$ FE SFP/4 x10/100 TX ports, or 8x 10/100 TX ports |
| Additional Interfaces |  |  |  |  |
| V. 24 Interface | 1x RJ11 socket |  |  |  |
| SD Card Slot | 1 x to connect auto-configuration adapter ACA31 (SD-card) |  |  |  |
| Gigabit Ethernet Network Size |  |  |  |  |
| Multimode Fiber (MM) | 50/125 $\mu \mathrm{m}, 0-550 \mathrm{~m}, 7.5 \mathrm{~dB}$ link budget; $62.5 / 125 \mu \mathrm{~m} 0-275 \mathrm{~m}, 7.5 \mathrm{~dB}$ link budget (with M-SFP-SX/LC) |  |  |  |
| Single Mode Fiber (SM) 9/125 $\mu \mathrm{m}$ | $0-20 \mathrm{~km}, 11 \mathrm{~dB}$ link budget (with M-SFP-LX/LC); $14-42 \mathrm{~km}, 5-20 \mathrm{~dB}$ link budget (with M-SFP-LX+/LC) |  |  |  |
| Single Mode Fiber (LH) 9/125 $\mu \mathrm{m}$ | $24-72 \mathrm{~km}, 6-22 \mathrm{~dB}$ link budget (with M-SFP-LH/LC); $70-128 \mathrm{~km}$, $15-30 \mathrm{~dB}$ link budget (with M-SFP-LH+/LC) |  |  |  |
| Fast Ethernet Network Size |  |  |  |  |
| Twisted Pair | 0-100 m |  |  |  |
| Multimode Fiber (MM) | $50 / 125 \mu \mathrm{~m}, 0-5000 \mathrm{~m}, 8 \mathrm{~dB}$ link budget; $62.5 / 125 \mu \mathrm{~m}, 0-4000 \mathrm{~m}, 11 \mathrm{~dB}$ link budget (with M-Fast SFP-MM/LC) |  |  |  |
| Single Mode Fiber (SM) 9/125 $\mu \mathrm{m}$ | $0-25 \mathrm{~km}, 13 \mathrm{~dB}$ link budget (with M-Fast SFP-SM/LC); $25-65 \mathrm{~km}, 10-29 \mathrm{~dB}$ link budget (with M-Fast SFP-SM+/LC) |  |  |  |
| Single Mode Fiber (LH) 9/125 $\mu \mathrm{m}$ | $40-104 \mathrm{~km}, 10-29 \mathrm{~dB}$ link budget (with M-Fast SFP-LH/LC) |  |  |  |
| Network Size - Cascadibility |  |  |  |  |
| Line-/Star Topology | any |  |  |  |
| Ring Structure | >200 Switches |  |  |  |
| Fault Recovery Time | 0 ms with PRP or HSR |  |  |  |
| Power Requirements |  |  |  |  |
| Operating Voltage | 24/36/48 V DC redundant, or 60/120/250 V DC and 110/230 V AC |  |  |  |
| Software |  |  |  |  |
| Management | V.24, Telnet, SSHv2, HTTP, HTTPS, TFTP, SFTP, SNMP v1/v2/v3, Traps |  |  |  |
| Diagnostics | LED, persistent logging, syslog, signal contact, device status indication, port mirroring N:1, RMON (1,2,3,9), TCPDump, LLDP, copper cable test, SFP management (temperature, optical input and output power), switch dump, configuration check dialog, system information, self tests on cold start, system monitor 1 |  |  |  |
| Configuration | Command line interface (CLI), web based management, full featured MIB support, BOOTP/DHCP client with auto configuration, HiDiscovery, autoconfiguration adapter ACA31 (SD card), Automatic configuration undo (roll-back), text based configuration file, CLI scripting |  |  |  |
| Security | MAC based port security, Authentication (IEEE802.1x), Guest/unauthenticated VLAN, Radius client, Restricted management access, Local user accounts, different privilege levels, management authentication via RADIUS, account locking, configurable password policy, account locking, audit trail, configurable login attempts, HTTPS certificate management, CLI/SNMP logging |  |  |  |
| Redundancy Functions | MRP, RSTP 802.1w, further protocols in preparation |  |  |  |
| Enhanced Redundancy Functions | - | - | Fast MRP, PRP, HSR (pending) | Fast MRP, PRP, HSR (pending) |
| Filter | QoS (8 classes), CoS queue management, interface trust mode, TOS/DSCP prioritization, port priority (IEEE802.1D/p), VLAN (IEEE802.1Q), IGMP snooping/querier per VLAN (v1/v2/v3), unkown multicast filtering, independent VLAN learning, static unicast/multicast address entries, fast aging |  |  |  |
| Time Synchronization | PTPv2 TC two-step, SNTP server and client, Buffered RTC |  |  |  |
| Flow Control | Flow control (IEEE802.3X), egress interface shaping, ingress storm protection |  |  |  |
| Miscellaneous | Port power down, cable crossing, dual image support, VLAN unaware mode, access to management restricted by VLAN |  |  |  |
| Ambient Conditions |  |  |  |  |
| Operating Temperature | $0^{\circ} \mathrm{C}$ to $60^{\circ} \mathrm{C}$ or $-40^{\circ} \mathrm{C}$ to $+70^{\circ} \mathrm{C}$, IEC $60068-2-2$ Dry Heat Test $+85^{\circ} \mathrm{C}, 16$ Hours, optional conformal coating |  |  |  |
| Relative Humidity (non-condensing) | 10\% to 95\% |  |  |  |
| Mechanical Construction |  |  |  |  |
| Dimensions (WxHxD) | 90 (98) $\times 164 \times 120 \mathrm{~mm}$ (EEC) |  |  |  |
| Weight | $1.2 \mathrm{~kg},(1.5 \mathrm{~kg} \mathrm{EEC})$ |  |  |  |
| Protection Class | IP30 |  |  |  |
| Approvals |  |  |  |  |
| Safety of Industrial Control Equipment | cUL 508 (pending) |  |  |  |
| Substation | IEEE61850-3, IEEE1613 |  |  |  |
| Transportation | NEMA TS2 (pending), EN50121-4 (pending) |  |  |  |

## RSP Series Managed Industrial DIN Rail Switch Configurator

Fast and Gigabit Ethernet Networks

RSP $\underline{3} \underline{5-08} \underline{03} \underline{306}$ TT-E K9 Y9 HP E 2R XX.X XX

RSP- = Rail Switch Power

## Data Rates

$2=10 / 100$ Mbit Ports
$3=10 / 100$ Mbit and 10/100/1000 Mbit Ports

## Hardware Type

0 = Standard
5 = Enhanced Redundancy (PRP, Fast MRP, HSR*), Hardware IEEE1588 v2

## Number of 10/100 Mbit Ethernet Ports

$08=8 \times 10 / 100 \mathrm{Mbit} / \mathrm{s}$
$11=11 \times 10 / 100 \mathrm{Mbit} / \mathrm{s}$
Number of 10/100/1000 Mbit Ethernet Ports
$00=$ None
$03=3 \times 10 / 100 / 1000 \mathrm{Mbit} / \mathrm{s}$
Uplink Ports
$3 Z 6=1 \times 3 \times$ SFP slot (100 Mbit)
$306=3 x$ SFP slot (1000 MBit)

## Port Configuration

TT = All Twisted Pair / RJ45
ZT $=4 \times$ SFP slot (100 Mbit) ; 4x (100MBit) Twisted Pair / RJ45

## Temperature Range

$\mathrm{S}=$ Standard $0^{\circ} \mathrm{C}$ to $60^{\circ} \mathrm{C}$
$\mathrm{T}=$ Extended $-40^{\circ} \mathrm{C}$ to $70^{\circ} \mathrm{C}$
E = Extended $-40^{\circ} \mathrm{C}$ to $70^{\circ} \mathrm{C}$ \& Conformal Coating
Voltage Range
CC $=2 \times 24 / 36 / 48 \mathrm{VDC}(18-60 \mathrm{VDC})$
K9 $=1 \times 60 / 110 / 125 / 220 / 250 \mathrm{VDC}(48 \mathrm{~V}-320 \mathrm{VDC})$ and 110/120/220/230 VAC (88-265 VAC)

## Approvals
